

CHAPTER 6

NEXT STEPS

The next step of the plan during the comment period is to continue community engagement with planning partners, advocacy groups representing underserved populations, and the general public. The focus of this outreach is on the action items and partners list, shown separately in Appendix E.

Upon adoption of Phase 2, the project team and partners will continue coordination with interagency teams to:

- Develop new or amended policies, rules, and laws
- Achieve state, regional, and local performance goals through implementation of the action items
- Track and report progress on action items through the website, fact sheets, and presentations

The draft plan and outreach schedule are posted on the WSDOT website at <https://washtransplan.com/>. A paper copy of the draft plan will be available for viewing at the WSDOT Headquarters Building at 310 Maple Park Avenue SE, Olympia, WA.

Thank you for reviewing and submitting comments on this draft plan.

“By 2035, Washington’s transportation system safely connects people and communities, fostering commerce, operating seamlessly across boundaries, and providing travel options to achieve an environmentally and financially sustainable system.”
